A-DCG | Alfobre Dublin Core Generator (simple)

[Main Page](#)[Simple Generator](#)[Advanced Generator](#)

Directions

- Fill in the fields below and click on "Generate Metadata!" to convert your input into fully formed Dublin Core metadata code. Additional options for the format of the output code are available below.
- Click on "Save Generated Metadata to File" to download a file with the metadata. On the left side of the button, there's an input field the you can use to choose the file name and extension.
- If you need additional copies of a given field, click the plus sign to the upper-right of the tag's name. Click the minus sign to delete additional fields.
- If you are unsure how a specific tag works, you can click the question mark next to the tag's name to visit the [Dublin Core™ User Guide](#).
- If you would like to use encoding schemes and the more advanced qualified elements of Dublin Core metadata, use the advanced generator.
